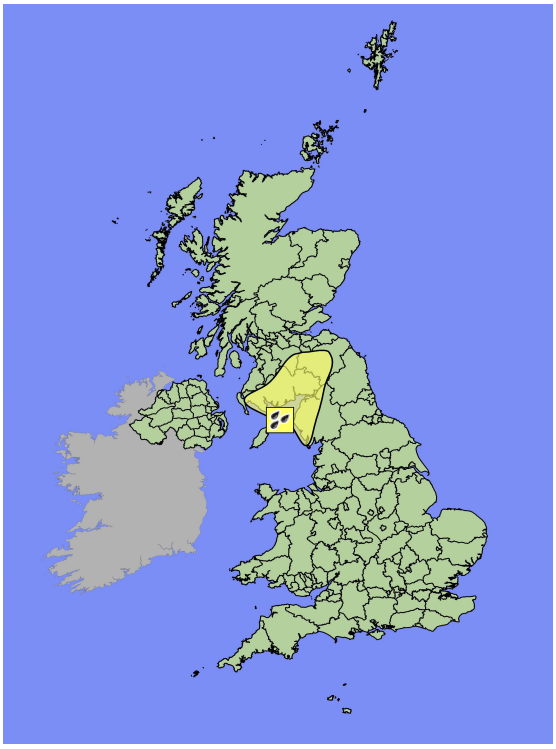
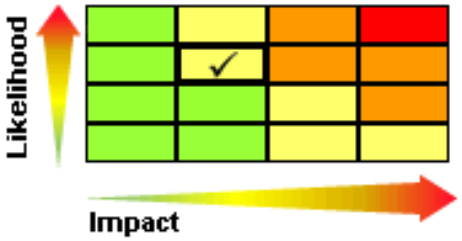
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure centred over Ireland will move steadily northeast during Saturday, to be centred over Cumbria by early evening. Bands of heavy rain and showers circulating around the low will affect southern Scotland and parts of northwest England. There will be some intense downpours which could produce as much as 15-20 mm of rain within an hour, whilst totals through Saturday could reach 50 mm in places, with the possibility of as much as 60-80 mm over the high ground of Dumfries and Galloway.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **00:30 on Sat, 16th Jun 2012** until **23:59 on Sat, 16th Jun 2012**

Further heavy rain and showers will affect southern Scotland and Cumbria during Saturday. The public should be aware that this may lead to localised flooding, as well as more general difficult driving conditions.
